

Flourishing Families

The **Flourishing Families Program** is geared towards supporting families within school communities who are identified as vulnerable by Principals, Guidance Counsellors or teachers. An Intake Form has been developed to capture objective information to assess and select the families for support.

These families are provided with care packages for a defined period and linked to resources such as government assisted programs, employment opportunities, and training, as needs are identified. Care packages include groceries, cleaning supplies, school supplies which are donated by supporters and partners.

The program provides an excellent opportunity for corporate sponsors, manufacturers, store owners or just naturally generous persons to support families in need.

Parents/guardians who are selected for the program, are expected to agree to the following for continued participation.

- participation in parenting initiatives at the school or in the community
- follow up on referrals made
- regular attendance at PTA meetings
- ensuring their children attend school regularly
